

DVE Telepresence Stage™

Express Yourself Live on Stage from 1000 Miles Away!

DVE's patented Telepresence Stage is a practical and affordable AR Telepresence (Augmented Reality) solution for seminars, events, tradeshows and classroom/training applications. Create the impressive visual effect of imaged people walking around in the 3D physical space of the stage! The DVE Telepresence Stage can be set-up in about an hour and the entire system is stowed in two road cases. In years past, the same effect required the complexity of hanging projectors on huge truss systems and the complexity of stretching delicate foils. This involved process has been completely eliminated with the new DVE Telepresence Stage making it the only intelligent solution for full body telepresence projection.

- ▶ True AR Telepresence (*Augmented Reality*) for special events
- ▶ Image people full body walking about the stage
- ▶ Quick and easy set-up (*No delicate foils or huge truss systems consuming the stage*)
- ▶ Satellite or terrestrial network hook-up for events around the globe
- ▶ Create stunning 3-D floating graphics on stage
